As soon as the mixture becomes thickened like jelly, the small pail should be placed inside the larger wooden one and the space between them packed with small pieces of ice. Salt is sprinkled on the ice and the small pail is turned backwards and forwards to hasten the freezing. As soon as frozen, the cream is ready to serve. Precautions.--Do not allow the milk to become too firmly coagulated after adding the rennet. As soon as it becomes jelly-like start the freezing. If a small ice-cream freezer is available, it can be used to advantage, but the two pails answer the purpose. Both before and after being used, all utensils should be thoroughly washed and cleansed. Note.--This lesson might be made most interesting for the boys and girls to work out together. It would give the teacher opportunity to help the pupils...
