Reviews

This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Michael Spinka)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 Excerpt: . A. C. Dixon, Sc.d., Trinity College. 1. The present paper gives an account and a proof of Lie's method of solving a differential equation in one dependent and any number (including unity) of independent variables. The arrangement of the proof is such as to facilitate the examination of certain cases of exception. Such are afforded by the tac-locus and cusp-locus of the ordinary theory with one independent variable, and their analogues, and also by an extensive class of equations in which the linear partial form is included, and the integration of which has been discussed by Mayerf. Notes are added on the nature of a complete primitive, the complete solution of the auxiliary linear equation, and the satisfaction of limiting conditions. Method of Solution. 2. Let z be the dependent variable, x_1, x_2, \dots, x_n the independent variables and p_1, p_2, \dots, p_n the partial differential coefficients of z . If u, v are any two functions of these $2n + 1$ quantities, denote the expression $n \frac{d(u, v)}{dx_1} - 8(u, v) \frac{r-l}{3} (r, Pr) \frac{r-3}{3} (, Pr)$ by the symbol (u, v) . See Forsyth, Theory of Differential Equations!, Part I. pp. 238--9; or Lie, Math. Annalen, Vol. vm. p. 242. t Math. Ann. Vol. vm. pp. 318--8. VOL. IX. PT. vi. 23 Then we know that the integration of any partial differential equation $f(x_1, x_2, \dots, x_n, z, p_1, p_2, \dots, p_n) = 0$ (1) depends on the solution of the linear equation $(/) = 0$ (2) for...
