# Skandinavismen Historisk Fremstillet

Filesize: 1.2 MB

Reviews

This sort of publication is everything and made me seeking forward and much more. Better then never, though i am quite late in start reading this one. I am easily could possibly get a delight of reading through a created pdf.

(Quinton Balistreri)

SKANDINAVISMEN HISTORISK FREMSTILLET

To get **Skandinavismen Historisk Fremstillet** eBook, you should refer to the link below and download the file or have access to additional information which are related to SKANDINAVISMEN HISTORISK FREMSTILLET book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Original publisher: Hampton, Va. : National Aeronautics and Space Administration, Langley Research Center, Institute for Computer Applications in Science and Engineering ; Springfield, Va. : For sale by the National Technical Information Service, 1991 OCLC Number: (OCoLC)59758695 Excerpt: . . . 4. Homogenization for Grid Structures Given the difficulties associated with the model for the grid described in the previous section, it is of interest to approximate grid-like and truss-like structures with a model that retains physical fidelity but is computationally more tractable than a direct physical model. One such approximate model can be formulated using homogenization techniques which were originally developed to model composite material structures. Here we outline results for a grid structure similar to that of Section 3. Details for this grid and other lattice truss derivations can be found in BCR , R , BLP , CS , CD , and SP . The basic idea in our use of homogenization is to approximate a model such as (3. 1)-(3. 5) or, equivalently, (3. 7), by a homogenized model (HE) on a domain in which the holes or perforations have been filled in . That is, instead of a perforated domain p, r aS described in Section 3, we wish to compute on the domain fl (0, a) (0, b). The model associated with this domain, even if it is plate-like in form, will, of course, be nonphysical. The coefficients in the distributed system will be nonphysical parameters. The homogenization procedures we outline here require periodicity in the structure (many regularly placed holes) as well as sparseness of material in the structure. Thus we consider a grid structure...
